

HH Goa 2026 Shortlisting Task: Build a Frame / ID Card Generator

⚠ Important:

Your submission will be flagged as an error if your X post doesn't actually contain the hashtag #FrameInGoa.

⚠ One submission per team only. Once a team has registered, any further submissions from that team will be rejected.

What to build

A web tool where someone uploads a photo and instantly gets back a branded HH Goa 2026 graphic, ready to download and share on X.

Pick one of the two formats below (or build both if you want):

Format A: PFP Frame/Overlay

A frame that sits around the uploaded photo, turning it into a ready-to-use X profile picture. The uploaded photo stays front and center, the frame just wraps it in HH Goa branding.

Format B: Builder ID Card

A card with the uploaded photo + name + a couple of fun fields (your stack/role, a generated 'builder title') laid out like an event badge, designed to be posted as an image, not printed.

Required flow

1. User uploads a photo (support common formats - JPG, PNG, HEIC from iPhone).
2. (Format B only) User fills in a couple of quick fields: name, stack/role, etc.
3. Tool generates the final graphic; should feel near-instant.
4. User can download the image.
5. User can hit Share to X: this should open a pre-filled tweet (image attached or a link whose preview shows the actual graphic) with a caption already written in.

No login wall. No signup gate before showing the result. It needs to work in one pass, start to finish.

Requirements

- Speed: Upload to finished result should be fast—a few seconds, not a loading screen.
- Handles real photos: Portrait, landscape, off-center crops, different aspect ratios; don't assume users will crop first.
- On-brand: It should be unmistakably this event, not a generic badge with a logo pasted on.
- Downloadable output: A real image file, not something that only renders on-screen.
- Working share flow: Pre-filled caption + hashtag #FrameInGoa. If you share via link rather than direct image attach, ensure the link preview (OG image) shows the generated graphic, not a blank/default thumbnail.
- Mobile-friendly: Most people will use this from their phone.

What to submit

- Live working link
- End results posted on X with the hashtag #FrameInGoa.

⚠ Remember: Submissions without an X post containing #FrameInGoa will be treated as invalid.

Where to submit
